                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Expansins are a novel class of proteins that catalyse the extension of plant cell walls and the weakening of the hydrogen bonds in pure cellulose. 2 Expansins (AAR94528 and AAR94529) have been identified rice and 3 in Arabidopsis (AAR94530-32). A cDNA clone (AAT13320) coding for cucumber expansins 29 (AAR94527) has been obtd. Expansins can be used e.g. in the mfr., de-inking and recycling of paper, in the textile industry, to aid delignification processes, to alter gel
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Expansin proteins which alter the mechanical strength of poly:saccharide(s) - useful in paper mfr. and recycling
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          04-APR-1996
